

CodX vs GPT-4o

Independent Benchmark — v1.0
June 18, 2026

CodX WINS — 50% vs 43%

Overall Results

Metric	CodX	GPT-4o
Average score	0.8731	0.8643
Questions won	23 (50%)	20 (43%)
Ties	3	3
Avg response time	15.4s	9.4s
Total cost (46 questions)	\$0.18	\$0.28

Results by Domain

Domain	CodX	GPT-4o	Winner	Wins
Code generation	0.9000	0.8972	CodX	4 vs 5
Code review	0.8894	0.8556	CodX	6 vs 3
Debug & fix	0.9143	0.8768	CodX	5 vs 1
System audit	0.8075	0.8688	GPT-4o	1 vs 9
Security audit	0.8694	0.8300	CodX	7 vs 2

Key Findings

- CodX wins 50% of questions vs 43% for GPT-4o across 46 scored questions.
- CodX is 1.5x cheaper than GPT-4o (\$0.18 vs \$0.28 for 46 questions).
- CodX dominates Security audit (7 wins vs 2) and Debug & fix (5 wins vs 1).
- CodX quality score is natively computed per response — GPT-4o has no equivalent.
- CodX is deployable on-premise — GPT-4o requires cloud access (US servers).

Methodology

50 questions by a neutral party across 5 domains. Each question submitted simultaneously to both tools. Scoring by a neutral AI judge on 4 criteria: correctness, quality, completeness, and clarity (0.0 to 1.0). Neither tool wrote the questions or scored the results.
